

EL GAOU NOUEMANE

AI Engineering Student | ENSIAS, Rabat

+212-626-858-814 | ouidadgaou@gmail.com | Rabat, Morocco

PROFESSIONAL SUMMARY

Second-year AI Engineering student at ENSIAS with a strong foundation in applied mathematics, deep learning, and large language models. Ranked 3rd nationally in Math Morocco 2024. Hands-on experience with LLM deployment, RAG pipelines, and combinatorial optimization through academic and industry internships.

EDUCATION

Engineering Degree in Artificial Intelligence — ENSIAS, Rabat | 2024 – 2027

Bachelor's Degree in Mathematics — Faculty of Science and Technology, Tangier | 2021 – 2024

High School Diploma, Mathematics — Mohammed VI High School, Martil | 2019 – 2020

INTERNSHIP EXPERIENCE

Research Intern – AI Engineering (1st year) — Mohammed VI Polytechnic University (UM6P), Benguerir | Jun – Aug 2025

- Investigated tropical geometry as a theoretical framework for designing novel neural network architectures.

End-of-Studies Intern (PFE) — Smart Automation Technologies, Tangier | Apr – Jun 2024

- Solved the 3D Bin Packing Problem using deterministic and stochastic optimization techniques (heuristics & metaheuristics).

CERTIFICATIONS

NVIDIA — Large Language Models (LLMs)

- Rapid Application Development with LLMs — Nov 2025 | ID: q5a--bjwRfKcl4c5aUBA4g
- Building RAG Agents with LLMs — Nov 2025 | ID: F9ZovHuZTm6dyzJPeUnGJ

COMPETITIONS & HONORS

- Ranked 3rd nationally — Math Morocco 2024 Competition (Math&Maroc, UM6P Benguerir)
- National Mathematics Olympiad Finalist — Selected in top 50 nationwide for IMO training camps (Math&Maroc, 2018–2020)

HACKATHONS

RamadanIA Hackathon — 3rd Place — Ministry of Digital Transition & Administrative Reform, Rabat-Sale-Kenitra | Ramadan 2026

- Co-built MAFQOODAT, an AI-powered lost & found platform to digitalize and automate lost item reporting and recovery.
- Designed AI-assisted matching workflows enabling individuals and institutions to report, match, and recover lost items efficiently.
- Selected for the national final; recognized as a scalable centralized lost & found infrastructure.

SKILLS

Machine Learning: Deep Learning, Neural Network Architectures, Reinforcement Learning

AI / NLP: Large Language Models (LLMs), RAG Pipelines, LLM Deployment

Languages: Arabic (native), French (professional), English (professional)

PROJECTS

- MLOps project – Polygenic virus analysis using tropical geometry.
- 3D video game development using Blender.
